Notification Form for Generator

If you use your generator that you import to Japan by freight, we have to report it to the fire department. Also please order fire extinguisher for generators that meets Japanese standards on the order form. As stated in the service park order form, the fire department has instructed us to set one fire extinguisher next to each generator. On that day, the fire department will check the generator and fire extinguisher.

Competitor/Team	
Driver name	

Generator Specifications

Name of manufacturer	
Model Name	
Fuel type	
Fuel tank capacity	liters
Fuel spill prevention	<input type="checkbox"/> Existence <input type="checkbox"/> Nonexistence

Please attach the photos of generator, if you have.

--

Fire extinguisher

The fire extinguisher must be labeled all "A" "B" "C" according to Japanese standards. ABC is a national standard (Japan) and indicates the type of fire that can be handled.

A: Normal fires

B: Oil fires

C: Electrical fires

- Please mark the position of your generator on the layout drawing.
- Regarding the setting position of the generator, we received guidance from the fire department that the distance between the generator and adjacent objects should be at least 1 meter. Make sure there is nothing within 1 meter around the generator.

This form and service park order form must be completed and sent to entry@rally-japan.jp by Wednesday, 18 of October.
